

## Anesthesiology Services from IAA

**The anesthesia services you will receive during your scheduled procedure are provided by Integrated Anesthesia Associates, LLC (IAA). We are an independent Anesthesiology practice.**

Your surgeon has specifically chosen our dedicated team to provide your anesthetic services, ensuring you receive the best anesthesia care possible. IAA's Board-Certified Anesthesiologists will work with our skilled certified registered nurse anesthetists (CRNAs) and your surgical team to ensure your safety and comfort throughout your procedure.

*Rest assured that IAA's Anesthesiologists  
will be monitoring and caring for you closely  
before, during, and after your procedure.*

Prior to your procedure, we will discuss your anesthetic treatment options, document your allergies, personal and family medical history, and all other information necessary for your anesthetic safety. Our team is trained to minimize anesthetic risk by designing an anesthetic plan appropriate for you.

Once your anesthetic treatment plan is developed, we will review the plan with you and answer any questions or concerns you or your family may have prior to your procedure.

Many of the IAA anesthesiologists working at our outpatient centers have advanced anesthesia training in Pediatric and Regional Anesthesiology, to name a few. If you or your loved one needs a Pediatric Anesthesiologist or is a candidate for a Regional Anesthetic (nerve block), rest assured that your IAA anesthesiologist will be able to provide you with the care that best suits you and your surgeon's needs. If a nerve block is planned, your Anesthesiologist will explain what that entails, what you should expect, and how it will benefit you.
